19	South Africa	George Airport
20	Tunisia	Monastir Habib Bourgiba International Airport
21	Tunisia	Enfidha-Hammamet International Airport

Sharm El-Sheikh airport has received ACI AHA accreditation. The audits focused on the health and hygiene measures put in place in Sharm El-Sheikh international airport in the context of Covid-19, including:

Cleaning and disinfection, physical distancing, staff protection, physical layout, passenger communications and passenger facilities.

Processes specifically adjusted to protect passengers and the airport personnel when they interact (check-in, boarding, or disembarkation), and customers and

those who cater to them at various outlets (duty-free, Food & Beverage, business lounge).

These measures are part of the international campaign “Protecting each other” developed and promoted by ACI Airports . They are based on hygiene recommendations issued by the World Health Organization (WHO) and the International Civil Aviation Organization (ICAO).

Egyptian Holding company for Airports and Air Navigation (EHCAAN) CEO Eng.Mohamed saied Mahrous said that "receiving this accreditation prove to the world that we serve that effective health measures have been put in place in compliance with the highest standards recommended by ICAO". He added " More Egyptian airports will be receiving the accreditations soon"
